

4x4_50 tip markers | 9.0mm marker in 11.0mm tile (1.0mm quiet zone)
PRINT AT 100% / ACTUAL SIZE (no fit-to-page, no scaling). Verify the 100mm bar with calipers before cutting.

bar = EXACTLY 100.0mm | black square of each marker = 9.0mm | cut on thin outline (11.0mm)
After printing: caliper one black square and DECLARE THAT MEASURED VALUE in the config, not the nominal.
